Cybersecurity for Employees

This training equips you with essential cybersecurity skills, focusing on protecting digital assets and understanding information security. It addresses digitalization risks, major cyber attacks, and common threats like phishing and social engineering. Participants will learn strategies for password, email, and mobile security, and safe online behavior.

Cybersecurity for Employees training includes three distinct specializations: Warehouse, Road Transport, and Trade Industry.

Elevate your cybersecurity—protect data and counter threats

Specializations

1. Warehouse Employees

2. Road Transport Employees

3. Trade Industry Employees

techclass

Warehouse Employees

This training covers cybersecurity in warehousing. You will learn how using digital technology to manage inventory and process transactions can make warehouses vulnerable to cyber attacks and how to prevent them. Through real-life examples, we discuss vulnerabilities and outline effective measures to mitigate risks, such as safeguarding buyer payment details and operational data.

Training Audiences

This training equips warehouse workers, logistics personnel, and salespersons with essential information security skills, emphasizing the critical role of safeguarding data and systems in warehouse logistics.

Industry Projects

amazon

ebay

Walmart

techclass

Road Transport Employees

This training focuses on cybersecurity within the road transportation sector. It discusses the risks linked to digitizing trucks and using technologies such as GPS and Electronic Logging Devices (ELDs). As trucks and their loads become increasingly connected, they are more vulnerable to cyberattacks that can disrupt operations and threaten safety.

Training Audiences

This training prepares truck drivers and transportation professionals to defend against cyber threats, emphasizing the importance of cybersecurity measures in protecting the industry.

Industry Projects

DHL Group

FedEx®

DAIMLER TRUCK

techclass

Trade Industry Employees

This training focuses on cybersecurity in the trade sector, emphasizing the crucial role of trade professionals in protecting sensitive data against cyberattacks. It outlines the risks of financial loss, reputational harm, and operational disruptions that can result from data breaches.

Training Audiences

Trade industry employees, including salespeople and customer service representatives looking to enhance their understanding of cybersecurity threats to protect sensitive business data.

Industry Projects

amazon

ebay

Walmart

How to Proceed

1 INFORMATION SUBMISSION

Begin by submitting your information. This step is crucial as it sets the foundation for your educational journey.

2 DELIVER TO JOTPA FOR APPROVAL

Once your information is submitted, it is sent to JOTPA for approval. This ensures that all the participants are eligible.

3 ADDING INFORMATION TO OPINTOPOLKU

After JOTPA's approval, your enrollment information is integrated into 'Opintopolku' system.

4 RECEIVE ENROLLMENT INVITATIONS

Post integration, you will receive invitations to enroll in the trainings based on the information you provided.

5 STUDY AND COMPLETE ENROLLMENTS

This is where your active learning journey begins. Engage with your trainings, and complete your enrollments to progress further.
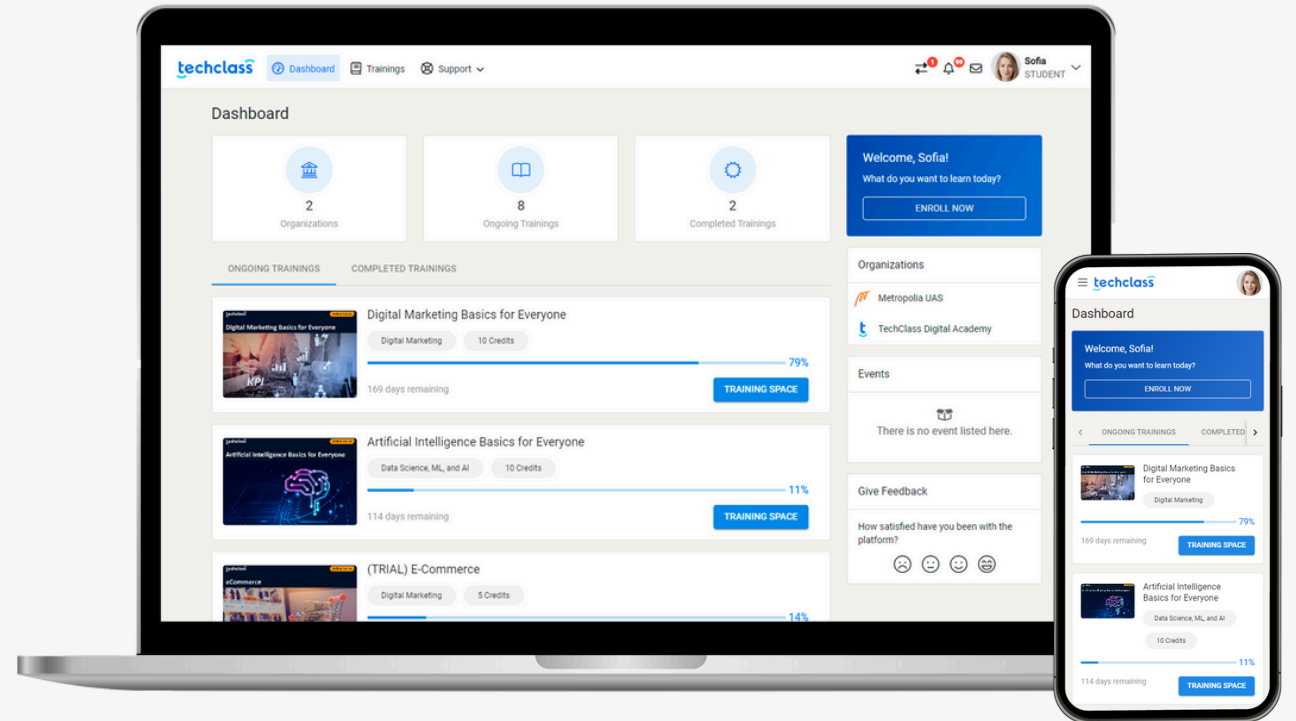

6 GET CERTIFICATE

Upon successful completion of your trainings, you will be awarded a certificate. This certificate is a testament to your dedication and mastery of the subject matter.

Students Testimonials

Hear from our students that how TechClass transformed their learning experience and helped them achieve their goals.

Elina Sumén
★★★★★
Metropolia UAS

The training are easy to follow and covered a good amount of knowledge. I found the assignments very useful; it was great to use the knowledge in practice right away.

Vladimir Miskovic
★★★★★
Laurea UAS

TechClass is an intuitive, convenient and efficient online platform. It makes online learning easier and faster, especially when it comes to AI and programming.

Anna Kurmaeva
★★★★★
Laurea UAS

The platform is flexibile and allows to do assignments at my own pace. The information is very well structured and leads a student throughout the studies.

Csépke Csilla
★★★★★
Metropolia UAS

The training were awesome. I am studying software development in aiukuisopisto, and I think TechClass courses helped me a lot to get the study place.

TechClass & SECLE

The Service Center for Continuous Learning and Employment (SECLE / JOTPA) supports the development of skills of working-age people and the availability of skilled labor in society as a whole.

SECLE increases the opportunities for working-age people to develop their skills by financing training courses that are shorter than a degree and meet the needs of a changing working life.

SECLE operates as a separate organizational unit under the Finnish National Agency for Education.

SECLE has implemented a competition to acquire training related to the competence services related to information security, cyber security and the data economy.

Funded by the European Union – NextGenerationEU

Funded by
The Service Centre for Continuous Learning and Employment

TechClass as a Provider

SECLE has selected TechClass Ltd as a service provider for the following sub-area:

Competence services related to information security, cyber security and the data economy
